**Re: Chemetco Superfund Site in Hartford, Illinois Response To USEPA
Request For Information dated April 10, 2012 concerning the Chemetco
Facility in Hartford, Madison County, Illinois.**

Dear Ms. Kerr:

Pursuant to your General Notice Letter, we would like to state that we have given USEPA all the information we have located thus far, as well as our utmost cooperation. We will continue to be forthcoming and cooperative in further proceedings as we were with you and Tom Martin at the Chemetco site on April 12, 2012.

Thank you for explaining to us our potential liability in this matter, although we believe our potential liability is debatable since we came into the picture after the fact. This is surely an issue for another time. We appreciate the detailed letter outlining any potential liability, as well as providing us with additional information.

Once again, we will continue to be cooperative and look forward to further dealings with you on this matter. Please do not hesitate to contact us with anything else that we may assist with.

Sincerely,

Penni Livingston,
Environmental Counsel
for the Bankruptcy Trustee Estate of Chemetco
